HTML, CSS, JavaScript
Node.js, Express.js, React.js
MongoDB, Redux, REST API
MVC Architecture, TailwindCSS, PostgreSQL
Handlebars, Postman, Razorpay
Firebase, Multer, JWT

MY PROJECTS

E-Commerce Application – Heat Shoes

Developed a robust ecommerce application equipped with an extensive set of functionalities, along with a comprehensive admin panel. This integrated solution empowers admin to efficiently manage products, inventory, and orders, while ensuring a seamless shopping experience for customers.

- Implemented Twilio for OTP verification.
- Integrated payment gateway of Razorpay for online transactions.
- Designed wallet, offers and coupon system to incentivize purchases and customer loyalty.
- Modelled admin panel with product, user, category and banner management; created sales report, charts and graphs for monitoring business performance.
- Successfully deployed application on AWS EC2 and Route 53 with load balancer for improved scalability and reliability.

MINI PROJECTS

To-Do List App

Built using React.js with basic CRUD operations and a clean, easy-to-use UI.

Netflix Clone

Built using React.js and integrated the TMDB API to display movie information.

OLX Clone

Built using React.js and implemented authentication methods.
